

# What do we all have in common?

## We've all had a colon health screening!

Regular screening starting at age 50 can stop colon cancer before it starts.

If you have a family history of colon cancer, you may need screening at an earlier age.

Don't wait for your medical provider to remind you. Ask TODAY about colon health screening!

For more information about FREE colon health screening for residents of King, Jefferson, or Clallam County call the Community Health Access Program
